

vacuum forming & clear pvc

DISPLAY PROTECTION - CLEAR PLASTIC

High clarity PVC. Ideal width for protecting display boards and mounted work. Easy to cut and pin, PVC does not tear, crack or burn like other plastics.

CLDPR **250 Micron PVC** 50 metres roll 1250mm width

VACUUM FORMABLE PVC

Widely used by industrial vacuum formers, PVC is valued for its great strength and its resistance to chemical attack, burning and tearing. The sheet available here is compatible with food use.

WHITE ROLL

VAC20W **0.5mm thick** 50 metre Roll 26" width

CLEAR ROLL

VAC20C **0.5mm thick** 50 metre Roll 26" width

BARGAIN VACUUM FORMING PACK

To include a selection of coloured, white, flocked and transparent PVC and HIPS. Supplied in economical sizes, with a thickness range from 0.25mm to 2mm.

VAC20 **20 Kilo Pack**

"Having discovered by accident your display protection - we saw it in use in another school - we can't now imagine how we managed without it. Initially we wondered how long it would last - the answer is that departments are now not changing displays as often as they should - and how reusable it would be - our main foyer display has been changed four times now and we are still using the same sheets. Add all of this to your excellent service and delivery of orders and you have a winner - for which many thanks."

K.Sherman, Deputy Head, The Hillcrest School, Dudley.

Dual purpose - this sheet is Vacuum Formable - ideal for blister packs
